

<https://aiapis.onrender.com/generate-speech>

Input :

```
{  
  "Input_text": "No quieres hacer un challenge nosotros, motivar y  
enseñar con nuestros ejemplo, un",  
  "Open_ai": "klasdjkas"  
}
```

Output: speech.mp3

- so when you call the api you can add a spinner loading to indicate that you're processing the request and when the request is done processing you can render the speech.mp3 as a sound

<https://aiapis.onrender.com/audio-to-text>

Input :

```
{  
  "audio": "audio.wav/audio.mps"  
}
```

Output: text
